

Hello Everyone,

I hope you are all keeping yourselves safe and healthy through this challenging time in our Country.

We are taking the Coronavirus/COVID-19 seriously and have instilled additional precautions for our employees to provide you with a safe and sanitary facility. We are working hard to keep the office open and fully operational.

Our company understands the importance of the trust you place in us and pride ourselves tremendously in providing the highest standards. We are following guidelines from the public health officials and government agencies, including the Center for Disease Control and the World Health Organization. We will take all appropriate measures to protect your health should any new direction be given. Naturally, we encourage everyone to practice good hygiene and other proactive healthy habits such as washing your hands and covering your mouth with your sleeve. As a precautionary measure, we are encouraging remote appointments. If possible, please send us your documents electronically and we will complete your taxes either over the phone or through email. Upon completion, we can email or mail you a copy of your return. In addition, the drop off service is continuing as normal.

As always, the health and well-being of our clients and our associates is of paramount concern. We will continue to monitor this quickly evolving situation and are here to assist our clients as needed. If you have any additional questions or concerns, please contact us at (215)462-7465.
